

Data collection anytime, anywhere

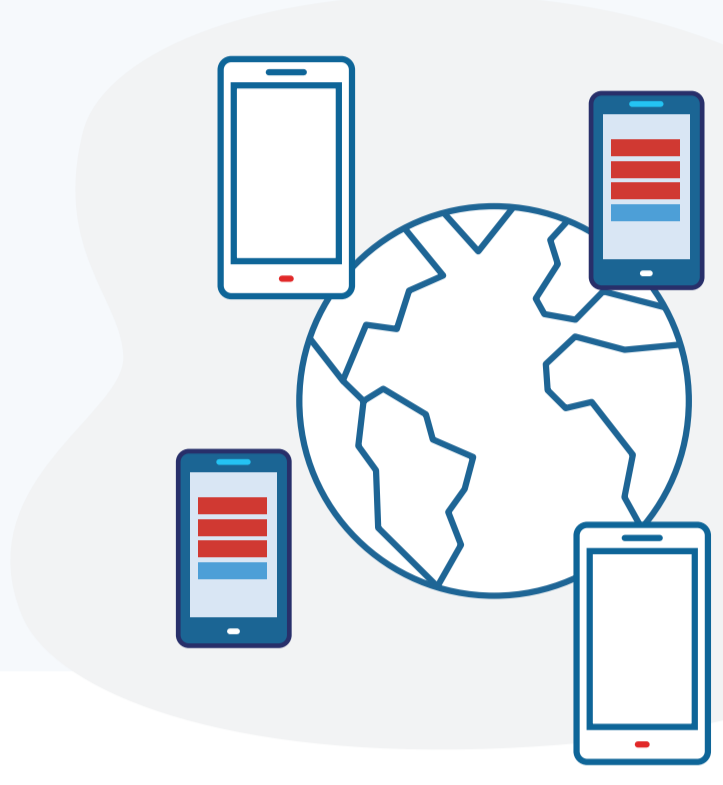

Reducing the burden for participants and sites alike

With mobile devices integrated into our daily lives — providing capabilities from banking to buying groceries — research studies now have the opportunity to leverage technology that allow users to **design, collect, access, and manage study data from anywhere.**

Why you should incorporate digital technology in your studies

MOBILE DEVICES ARE OWNED BY:

3.7 billion people worldwide **96%** of Americans

Make it easy for patients and sites.

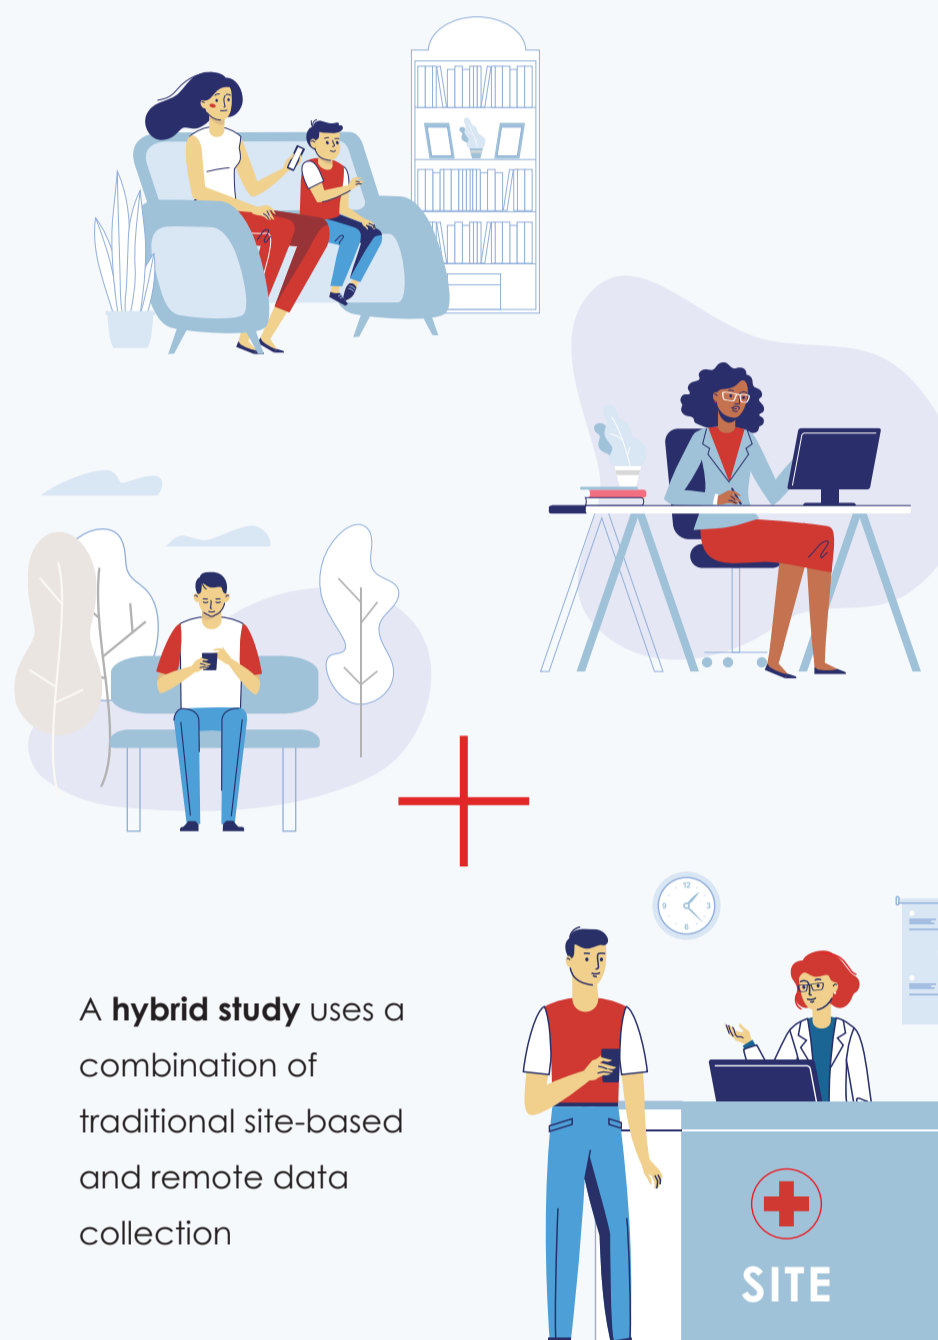

- ✓ Reduce patient burden by requiring less time and travel
- ✓ Reach a more diverse patient base (eg, homebound or rural-dwelling patients)
- ✓ Reach a wider patient base (eg, rare diseases)
- ✓ Reduce site burden by minimizing disruption to regular patient care

Avoid delays and improve data quality.

- ✓ Accelerate patient enrollment
- ✓ Improve patient retention by integrating research into the patient's daily routine
- ✓ Collect real-world data directly from patients
- ✓ Enable more flexible data collection and more frequent time points
- ✓ Decrease missing data and errors through e-notifications and automatic data checks

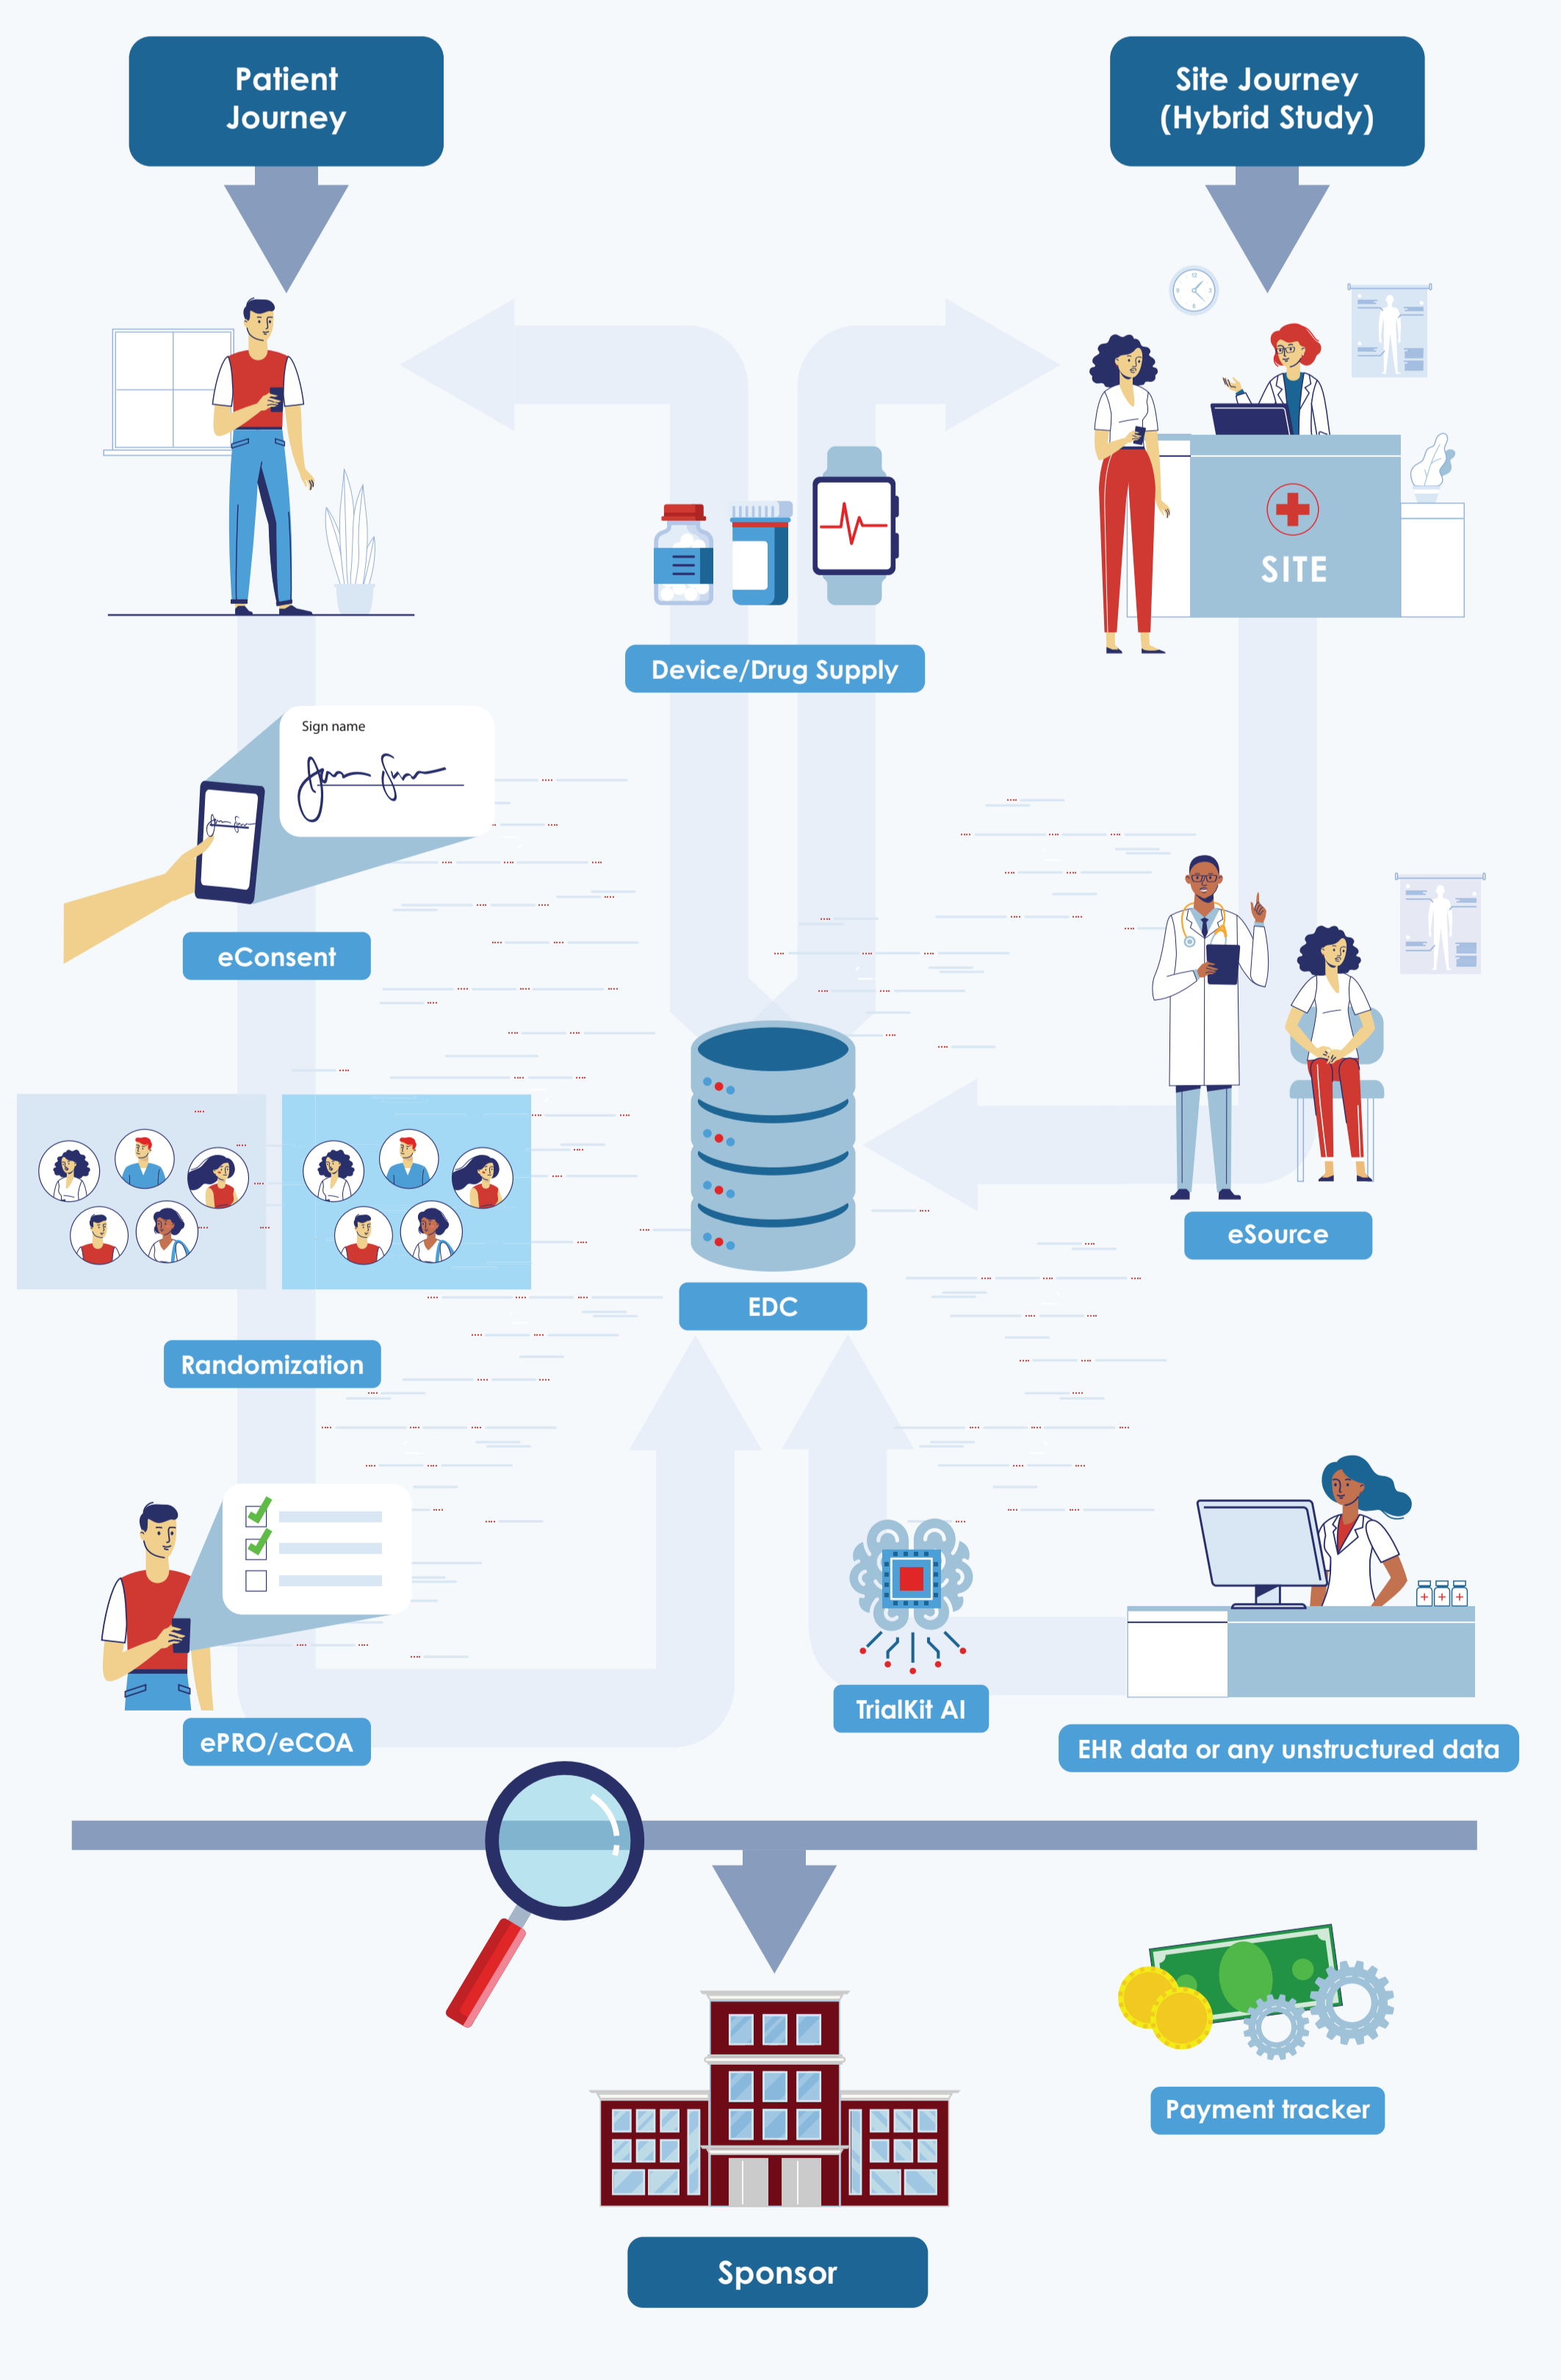

MULTIPLE NAMES, SAME CONCEPT:

- Remote studies
- Virtual studies
- Decentralized studies
- Patient-centric studies

The TrialKit platform by Crucial Data Solutions was purpose-built for virtual or hybrid study approaches.

From patient eConsent to product reconciliation and activity-driven site payments, the fully integrated, secure, cloud-based TrialKit platform enables eCRF creation, data collection, data access, and data management from the native mobile app on iOS and Android devices as well as web browsers — anywhere in the world.

Essential TrialKit features:

- ✓ Full integration throughout the platform, allowing real-time access to data from any source, at anytime
- ✓ Single sign-on
- ✓ Role-based access
- ✓ Fully featured native mobile app
- ✓ BYOD-enabled, eliminating the need for device provisioning
- ✓ AWS cloud-based
- ✓ Compliant with all privacy requirements, including HIPAA and GDPR
- ✓ 21 CFR Part 11 compliant

Power your studies with technology that allows ALL users to collect, access, and manage study data from anywhere. Ready to see the capabilities of TrialKit for yourself?
